

## **Narragansett High School Senior Project Planning Process Reflection**

---

**This reflection is your opportunity to look back on the initial stages of your Senior Project experience, from the moment you decided on a Senior Project topic through the time when your project was approved by the Senior Project Review Board.**

**Your reflection should be typed and follow the proper MLA format for font, spacing, the heading, and the body paragraphs. Give your reflection a personalized title. In essay format, please address the following questions.**

What did you accomplish during the planning phase? How do you feel about your accomplishments?

What problems did you encounter during this planning process? (i.e. topic selection, finding a mentor, choosing a research paper topic, showing a learning stretch, and deciding upon a product)

How did you overcome any problems or obstacles that you encountered?

What did you learn about yourself during this phase? How will you use what you learned during the rest of this year?

What are your best hopes for your Senior Project this year? What are your biggest concerns?
