

RIDE Applied Learning Standards (RALS)

RALS-1

Critical thinking, in which the student detects incompleteness, inconsistency, and opportunities for expansion of ideas, products, procedures, etc. and formulates core questions and assertions about topics of areas of interest.

RALS-2

Problem solving, in which the student organizes and conducts a process to create intellectual or physical products, hold an event, conduct a process, or otherwise move towards the solution of an identified issue or problem.

RALS-3

Research, in which the student uses information tools and technology to learn and deepen his or her understanding about a topic or area of interest.

RALS-4

Communication, in which the student questions, informs, and learns from others.

RALS-5

Reflection, in which the student reviews past activity and thinks critically about past activities and plans for the future.
