

Yes Test for the Senior Project Portfolio Tour

The first opportunity to make a good impression on the Senior Project judges is through your electronic Senior Project Portfolio Tour. Presenting yourself in the best light possible is important. Your portfolio **must** be proficient for you to be eligible to present on Presentation Day. To reach proficiency on your Portfolio Tour, all required items must be included in the proper format and you must have been graded "proficient" on all entries. Documents should be in the required order and saved in either PDF or JPEG format. Some of your entries will be electronic scans (they are identified on the list below). Your scanned documents should be in the best condition possible, not bent, crumpled, or torn, and they should not be upside down or sideways. **Do your best with what you have.** Your teacher will use this list to determine if you have met all the criteria. **To ensure success, do a self-assessment using this yes test prior to submitting your portfolio.**

Yes No
